

SECTORAL REPORT

AUTO

AUTO SECTOR.

The Indian automobile industry has long been a reliable barometer of economic performance, given its critical role in both macroeconomic expansion and technological advancement. Within the sector, the two-wheeler segment dominates in terms of volume, driven by a growing middle class, a predominantly young population, and rising demand from rural markets. Demand for commercial vehicles has also strengthened, supported by the expansion of logistics and passenger transportation services. Market growth is expected to be shaped by emerging trends such as vehicle electrification, particularly in three-wheelers and small passenger cars.

India has also established itself as a prominent auto exporter with strong growth prospects in the near future. Automobile exports rose 19% in FY25 to over 5.3 million units, led by robust demand for passenger vehicles, two-wheelers, and commercial vehicles in global markets. Complementing this momentum, government initiatives such as the Automotive Mission Plan 2026, the scrappage policy, and the production-linked incentive (PLI) scheme are expected to position India as a global leader in both the two-wheeler and four-wheeler markets.
